

# ENVIRONMENTAL MANAGEMENT SYSTEM POLICY STATEMENT v3

8<sup>th</sup> March 2023

The company believes that it has a moral obligation to protect the environment. We recognise that our activities have an impact on the environment and we are committed to minimising our impact and we operate an environmental management system that meets the requirements of ISO14001:2015.

The scope of our system is:

The construction, management and maintenance of low rise buildings. The installation, maintenance and servicing of active and passive fire protection systems, emergency lighting and fire appliances. The design, installation, commissioning, handover and maintenance of fire door sets, fire detection and fire alarm systems

We are committed to:

- Fulfil our environmental legal and other obligations
- Prevent pollution and those commitments relevant to the context of our obligation.
- Define and review any actual and potential impacts that our activities may have on the environment.
- Continual improvement by setting objectives and targets and reviewing our performance on a periodic basis.

We shall:

- Identify and manage key risks and have plans in place so we can respond to all foreseeable environmental incidents and emergencies.
- Involve our employees and contractors in our environmental programmes and make sure they have the necessary skills and information to carry out their roles effectively and have the minimum impact on the environment.
- Keep our employees informed by communicating our policy and objectives to them so they are aware of our performance.
- It is the responsibility of all of us to carry out our tasks to help meet our objectives and all are invited to contribute their ideas for improvement.
- On request, our policy is made available to all including the public.

Our policy will be reviewed during our planned management review and revised as necessary.

Ron Bailey  
Managing Director
